

The schemes on training development support and assessment & evaluation linkages using the NCS

Su-won Kim, Hyun-mi Na, and Ga-young Kim

In this study, enabled the NCS-based training courses, with plans for training and development support so as to develop a training course using National Competency Standard(NCS) actively conducted. Aims to derive a plan to link the skills development training institutions evaluation and training to maintain and improve the quality of screening for such training.

Looking at the main NCS-based training and development support, and review the evaluation linkages derived from this study are as follows.

First, it is determined in the NCS-based training course development support needed to develop their own training institutions teaching the test system and recognition system. And the limited time that is deemed necessary to support the actual cost payment and settlement systems to ensure training facilities and equipment. And this is deemed necessary in the provision of corporate and institutional apparatus for providing equipment and training institutions free of charge subject.

In addition, staff capacity building, strengthening links with the review and evaluation to strengthen academic cooperation set as the screening criteria and evaluation criteria related to job training, and institutional strengthening for Cooperation incentive grant exemption for the industry, such as toiletries and training institutions the institutional unit is deemed necessary for the administration and legal obligations, including financial support, support for costs.

In addition, training institutions operating target enrichment courses, follow-up studies are deemed necessary for the specific measures provided for strengthening university-industry cooperation and capacity building of the customized consulting staff conducted in accordance with institutional type and size, depth and occupation.

Second, in conjunction with the NCS training for screening is preferably composed of a center-based training course on the NCS since 2016 that has developed over the entire job judging the NCS and completed training criteria based learning modules and training materials development.

Also, building a regional center system of regular review process, and is ready and institutional mechanisms deemed necessary to expand the national technical qualifications and other countries eligible for course evaluation form qualifications.

In addition, the classification created by NCS(857) based on the Unit Price Table for expenses paid to NCS standards. And it is desirable to provide each year as before consulting tailored according to the prior presentation and evaluation results of the screening process based on training.

Third, for evaluation of the linkage with training facility NCS is preferably set as a separate item in the evaluation and training institutions assess whether NCS applied since 2016 with the development and NCS are completed throughout the training standards and job-based learning modules and training materials development.

In addition, it is determined that you need to prepare for the training institutions and institutional arrangements, including the introduction of conformity assessment certification target of NCS-based curriculum.

In addition, the NCS-based training to build the operational DB equipped with such training, operations and performance, teaching and learning history of trainees. And it is desirable to provide each year as before consulting tailored according to the pre-training facility in the presentation and evaluation of the evaluation criteria.

If you set a linked system of NCS training, examination and assessment to improve the quality of vocational training in national competency standard(NCS) with the aim to enable the vocational training institutions apply Assessment Certification premise implemented as the following [Figure].
